

(C++) Computer Programming

Assignment - 1

1. Run the following codes:

(a) `#include <iostream>`
`using namespace std;`

```
int main()
{
    int num1, num2, sum;

    cout << "Enter first number: ";
    cin >> num1;

    cout << "Enter second number: ";
    cin >> num2;

    sum = num1 + num2;

    cout << "Sum = " << sum << endl;

    return 0;
}
```

(b) `#include <iostream>`
`using namespace std;`

```
int main()
{
    int num;

    cout << "Enter an integer: ";
    cin >> num;

    if (num % 2 == 0) {
        cout << num << " is an Even number." << endl;
    } else {
        cout << num << " is an Odd number." << endl;
    }

    return 0;
}
```

```

(c) #include <iostream>
    using namespace std;

    int main() {
        int num, i;
        bool isPrime = true;

        cout << "Enter a positive integer: ";
        cin >> num;

        if (num <= 1) {
            isPrime = false;
        } else {
            for (i = 2; i <= num / 2; i++) {
                if (num % i == 0) {
                    isPrime = false;
                    break;
                }
            }
        }

        if (isPrime)
            cout << num << " is a Prime number." << endl;
        else
            cout << num << " is not a Prime number." << endl;

        return 0;
    }

```

* * * * *
