

(C++) Computer Programming

Tutorial - 2

1. What will be the output of the following C++ program?

```
#include<iostream>
using namespace std;

int main()
{
    int x = 10;
    if (x > 5)
    {
        if (x < 8)
            cout << "A";
        else
            cout << "B";
    }
    else
        cout << "C";
    return 0;
}
```

2. Print all odd numbers from 1 to 50 using a while loop.
3. Write a program to compute the factorial of a given number.
4. Write a program to print all factors of a given number.
5. Write a program to check whether a given number is prime or not.
